ABSTRACT

This survey was conducted during the spring of 1994 for the purpose of determining the attitudes of student leaders in the nation's high schools. Eight thousand surveys were sent out to students, of which 3177 were returned. All students surveyed were members of the junior or senior class during the 1993-94 academic year. They were selected for recognition in "Who's Who" by their principals or guidance counselors, other faculty members, national youth organizations or the publishing company, because of their high achievement in academics, activities, community service, athletics or their performance in national scholarship or award contests. The survey was tabulated by computer. Questions were tabulated by total response; breakdowns by sex, race, type of school attended and type of community are also included. The survey addressed issues such as: (1) School Violence; (2) Cheating in School; (3) Sexual Behavior; (4) Sexual Harassment, Assault, and Date Rape; (5) Cigarettes, Alcohol, and Drugs; (6) Peer Pressure. ## Introduction

This survey was conducted by *Who's Who Among American High School Students*, Lake Forest, Illinois, during the spring of 1994 for the purpose of determining the attitudes of student leaders in our nation's high schools. It is the largest independent sampling of this segment of the student population taken annually and this year marks its 25th anniversary. *Who's Who* believes that, in these rapidly changing times, it is important for the nation to be aware of students' opinions and attitudes. Today's teens are not only an important segment of the present voting population, but will be assuming positions of leadership as this country enters the 21st century. Hopefully, as the data from this 25th national survey is circulated and studied, significant trends will be uncovered.

We regard this survey as an educational experiment. We are in no way attempting to promote or negate any political, moral or social philosophy, organization, firm or individual. Because of our contact with student leaders, we believe we are in a position to gather important facts and meaningful information and, therefore, have a corporate responsibility to conduct this survey.

This year's questionnaire is a composite of questions asked over the past 24 years. Questions were developed with the help of a 25 student Advisory Board and educators across the country.

Although we of *Who's Who* feel that some of the questions and answers are of a private and controversial nature, we do not hesitate to take the responsibility for the project in order to achieve our objective of identifying and measuring students' attitudes. We apologize to anyone offended by any of the material presented herein.

Though by nc means a reflection of today's "average" student because it is dealing with the opinions of student leaders and high achievers, we feel this survey does give insights into the thoughts of those leaders who set standards and behavior patterns for others to follow.

Of the nearly 725,000 high achievers featured in the 1994 edition of *Who's Who Among American High School Students*, 8,000 students were sent the survey and 3,177 completed questionnaires were returned.

These 3,177 responses form the base of the survey. All students surveyed were members of the junior or senior class during the 1993-94 academic year. They were selected for recognition in *Who's Who* by their principals or guidance counselors, other faculty members, national youth organizations or the publishing company because of their high achievement in academics, activities, community service, athletics or their performance in national scholarship or award contests.

The students listed in the 28th Annual Edition of *Who's Who* represent just over 6 percent of the 12,000,000 students who were in high school during the 1993-94 academic year. They represent approximately 18,000 of the 22,000 public, private and parochial high schools in the nation.

This survey was tabulated by computer. Questions were tabulated by total response; breakdowns by sex, race, type of school attended and type of community are also included. On questions calling for write-in answers, results are shown of the most frequently mentioned answers.

## Participant Data/Demographics*

*Who's Who Among American High School Students* is a recognition and service program published by Educational Communications, Inc. (ECI). For 28 years, *Who's Who* has recognized high-achieving high school students nationwide and continues to serve as a reference for groups and institutions interested in student achievement.

The nearly 725,000 high-achieving students listed in the 28th Edition of *Who's Who* represent approximately 18,000 of the 22,000 public, private and parochial high schools across the country.

Public, private and parochial high schools are invited to nominate students who have achieved a "B" or better grade point average and demonstrated leadership in academic areas and extracurricular activities.

There are no charges to students or sponsors contingent upon this recognition award.

Since 1978, the ECI Committee on Ethics, Standards & Practices, comprised of distinguished educators, has advised ECI on educational services and the content and policies of the directories.

Programs and services made available to recognized students:

- Scholarships
- College Referral Service
- Grants-In-Aid Program
- College-Bound Digest

ECI's publications include:

- ***Who's Who Among American High School Students***
- **Annual Survey of High Achievers**
- **College-Bound Digest**
- **The National Dean's List**
- **Who's Who Among America's Teachers**
